

INSTRUCTIONS for NEW BARRELS

HANDLING

- Handle with care
- Do not damage any part of the product

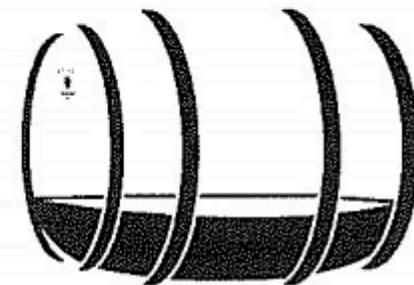

STORAGE

- New barrels should be stored in their original packaging, tightly wrapped in plastic, to protect from drying out
- Barrels require the following optimal storage conditions:
 - 75-85% humidity
 - 10-20 °C (50-68 °F) temperature
 - No direct sunlight
 - No air currents
 - Low light
- Cover any exposed parts to protect from UV light
- Do not allow contact with any chemicals

CLEANING

- Use a clean brush or wipe with clean, wet cloth
- Do not use chlorine solutions on or around barrels
- Do not use any chemicals or commercial cleaning products

BEFORE FIRST USE

- 1 | Remove all packaging
- 2 | Fill up the barrel with minimum 20-25 Liters (5-6 gallons) of clean, chlorine-free water
- 3 | Keep it in horizontal position for minimum 6 hours or overnight
- 4 | Turn the barrel to a vertical position for minimum 4 hours on each end
- 5 | Completely drain the water
- 6 | Use as intended
